## New Center for Construction Excellence . . . *Building the Future, One Student at a Time.*

Please help us advance hands-on learning at Cal Poly—one of the best construction management programs in the nation. Never before has your support been so important to future generations of CM students. These promising constructors of tomorrow will help solve California's urgent housing, facility and infrastructure needs.

Your gift will help ensure completion and furnishing of important planned spaces in the new **Center for Construction Excellence** at Cal Poly. As a friend of the department, we invite you to participate in the future development of the program.

Cal Poly • San Luis Obispo

**You're Invited to Help Launch  
New Facilities and Enhance  
Construction Education**

— \$1 Million Alumni Campaign —

We are delighted to announce that construction begins this spring on the new Center for Construction Excellence. For the first time, the Construction Management Department will occupy facilities explicitly designed and constructed to support construction education. This is perhaps the most significant milestone in the life of the department since the first class graduated in 1972.

The new Center is set to receive 60% of its funding from the state of California. A major fund-raising campaign in 2005, mostly among corporate sponsors, has further leveraged these state funds to provide entirely unique, named labs and classrooms impacting construction education for generations to come.

In 2006, the department is looking to supplement these corporate sponsorships with the **Construction Management Alumni Fundraising Campaign**. Support raised from alumni over the next year will complete additional planned spaces in the Center and outfit it with much needed furnishings and equipment.

**New Center for  
Construction  
Excellence**

**Building Summary**

Type of Instructional Space & Goals	Square Footage	Funding
Total Building: <i>Phase I</i>	46,000 SF	\$17.5 M
– University General-use Lecture Spaces	12,000 SF	\$4.9 M
